To: Clyde Eisenbeis Date: 3/30/88

Just a note to say MANY THANKS for all you have done for engineering education at UND. Your contributions are much greater than most of us realize. You have been the "spark plug" firing the whole E.E. Advisory Council engine. You have and are making a significant difference in electrical engineering education at UND. Reading your fine report at the March 4 E.E. meeting reminded me of all you are doing for us. Thank you again. Keep up the outstanding work. Alan.

December 23, 1989

Dear Clyde,

Thank you very much for your very generous contribution and your continuing support for the School of Engineering and Mines. We will use your gift together with Bob's match to acquire a computer to be used to enhance classroom teaching and the development of technology in that area.

Best wishes for a happy holiday season and for the new year —

Sincerely,  
Tom

March 16, 1990

Dear Clyde,

Thank you very much for taking time once again to participate in the UND School of Engineering and Mines Advisory Council meeting. Your advice and counsel are very helpful as the Department of Electrical Engineering looks toward its future. If you have suggestions or want to talk again about the group and its future, please call. I really appreciate your continued interest in the department and your concern about its future. The relationship of the department with its alumni and friends is vitally important, and I want to insure its future success.

Please call me any time that you receive feedback from your committee members or when you want to share ideas to make things better. We can use all of the assistance we can get from thoughtful and concerned alums.

Sincerely,

UNIVERSITY OF

NORTH DAKOTA

Oakdale, MN 55128

Dear Clyde:

Just a note to commend you on your most recent E.E. Advisory Council newsletter. Clyde, there is really no way of measuring the beneficial impact to the E.E. Department, the School of Engineering and Mines, and this University from your loyalty, dedication, and hard work. We want you to know it is all much appreciated.

Homecoming '90 was a great success! My only regret is that Jan and I did not have an opportunity to visit with you and Sheryl. Hopefully, we can get together for a relaxed conversation over dinner or lunch sometime in the near future.

Whenever you are in this area, please stop by the Alumni Center! Give me a call before you arrive. Thank you again for everything! With warm personal regards.

Sincerely,

Earl S. Strinden  
Executive Vice President

Alyde -

I've meant for some time to comment on your "stepping down" from the Council.

No doubt your reasons were good; that's not an issue.

I just want you to know that, in addition to your very substantial contributions to the well being of UND and its EE department, you've been, for me, and I suspect for others, a wonderful example of the effectiveness of an individual in a worthwhile cause.

I salute!

With best wishes,

John

Dear Sheryl and Clyde -

Your support of UND and the SEM is truly appreciated. You know well that your contribution makes a big difference.

Clyde - your work at recruiting, running the 3M program etc. is so important to us and you are doing a fine job, showing a great deal of initiative (and stamina). Thank you for that and thank you Sheryl for your support also. Best regards,  
Mogenus
